

Pathway to a PhD in the Sciences - PART I

Get Paid to Get a PhD!

This workshop will cover how PhD programs in the STEM and biomedical sciences fields work, funding and a preparation timeline, including when to take the GRE, writing your personal statement, research statement & CV; discussion on career pathways that open up to PhD recipients, including current average salaries in academia, industry, and government, reaching out to faculty who you're interested in doing your PhD with; volunteering/working in a research lab as early as possible.

The content for this workshop applies to students in the STEM and Biomedical Science fields, but anyone from any field is welcome to join.

Facilitated by:
**Dr. Erin McCauley, Department of
Chemistry & Biochemistry**
