

Intro to **SPSS**

A Software for Advanced Statistical Analysis

Come take a walk through the basic statistical techniques used in SPSS! Quantitative data management and analysis are primary research skills. This workshop will help students to understand how their data should be organized to perform basic descriptive and advanced analysis. SPSS student leaders will also share their experiences in working with SPSS.

Facilitated by Professor Monique Turner, Department of Psychology

SEPT 26 | 2:30-3:30 PM | Via Zoom
