# Add/Replace Page Banner Picture
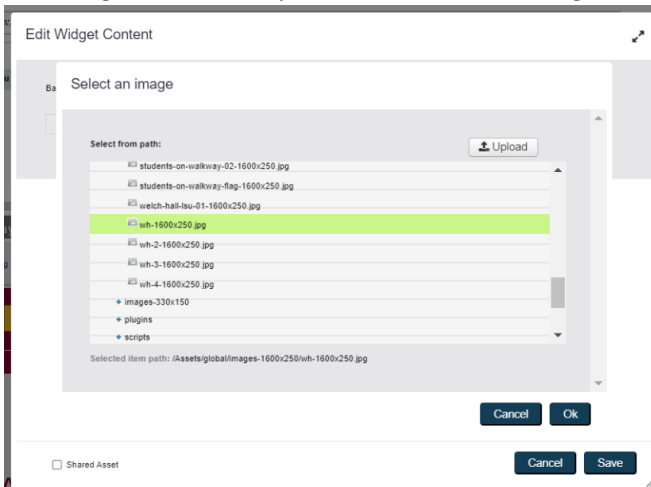

1. Open page in and click Edit in CM1.
2. If the page banner space did not have an image inserted yet, the first widget showing "This widget is empty" is the place for page banner image.

3. If the page banner space already has an image inserted, then just single click on the image.
4. Click "Edit local content" icon on the right side of the widget area.

5. Click Browse and navigate to the image file under Assets folder.
   The image in this example is located at /Assets/global/images-1600x250/wh-1600x250.jpg.

6. Click OK after highlighting the image file.
7. Click Save under Edit Widget Content window.
